

**Listing of Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application.

Claims 1-55 (cancelled)

Claim 56 (new): A cDNA library produced from a glioma tumor stem or progenitor cell, said library comprising cDNAs encoding at least one marker of neuronal lineage and at least one marker of glial lineage.

Claim 57 (new): The cDNA library of claim 56, wherein said marker of neuronal lineage is selected from the group consisting of beta-III tubulin, neuron-specific enolase, neurofilament M, tenascin, and MAP2, and said marker of glial lineage is selected from the group consisting of glial fibrillary acidic protein and nestin.

Claim 58 (new): The cDNA library of claim 56, wherein the library is produced from a collection of expressed gene transcripts isolated from a microclone comprised of a plurality of cells, each cell of which is the progeny of a single glioma tumor stem or progenitor cell.
